

Tile Spacers

Tile spacers are available in a variety of sizes and package quantities from 1.5mm through to 8mm.

This convenient product is easy to use and provides consistent tile spacing. They are made out of high-grade polystyrene allowing for easy breaking of the 'legs' when tiling up to an edge. All Tileasy spacers once in place can be grouted over. Tile spacers are available on sheets that allow for easy breaking, or more conveniently in loose form. Traditional tile pegs in 2mm are also available.

Loose Spacers

Product code	Spacer size	Pack quantity	Outer pack
